PROFESSIONAL SUMMARY

Results-driven Full Stack Developer & Cybersecurity Engineer pursuing B.Tech at GHCEM, with hands-on expertise in AI-powered automation, DevSecOps, and blockchain. Proven track record of building production-grade systems: reduced operational effort by 80% via intelligent automation workflows, architected APIs handling 5,000+ monthly requests at 99.9% uptime, and earned Top 3 finishes in back-to-back university hackathons. Passionate about engineering secure, intelligent systems at the intersection of AI, automation, and cybersecurity.

TECHNICAL SKILLS

Cybersecurity: Zero-Trust Architecture, OWASP Top 10, FIDO2/WebAuthn, SIEM, DevSecOps, IAM, Penetration Testing, Vulnerability Assessment, NIST Frameworks

AI & Automation: Agentic AI, n8n, Make (Integromat), Workflow Automation, LLM Integration, AI Agents, Prompt Engineering, RAG Pipelines

Blockchain & Web3: Solidity, Hardhat, Web3.js, Ethereum, IPFS, Smart Contract Auditing

Hardware & Quality Assurance: Quality Inspection, Visual Inspection, PCB Testing, SAP, Embedded Device Troubleshooting, Soldering

Development & Tools: Python, JavaScript, React, Node.js, SQL, REST APIs, Docker, Git, CI/CD, Linux, Burp Suite, Wireshark

EXPERIENCE

Ecozen Pune City, Maharashtra, India
Quality Control Inspector Jun 2026 – Present

- Perform Incoming Quality Control (IQC) inspection and testing of PCBs, sensors, and electronic components.
- Conduct functional testing, troubleshooting, soldering, and programming of embedded electronic devices.
- Manage quality records, inspection reports, and material tracking using SAP.
- Collaborate with production, engineering, and supply chain teams to ensure compliance with quality standards and specifications.
- Ensure adherence to quality processes, documentation requirements, and continuous improvement initiatives.

STSARC Nashik, India
Full Stack Developer Intern Dec 2025 – MaY 2026

- Engineered 15+ production React components and Node.js microservices, slashing page load latency by 15% and improving rendering throughput by 25%, directly enhancing end-user experience across key product flows.
- Overhauled SDLC workflows via Git branching strategies and CI/CD automation, cutting deployment errors by 30% and accelerating release cycles across the engineering team.

TECHNICAL PROJECTS

Intelligent Business Process Automation Suite — *n8n, Python, OpenAI API, Webhooks, REST APIs, Telegram Bot*

- Architected a modular, event-driven automation platform using n8n orchestrating 8+ end-to-end workflows including lead capture, invoice processing, customer onboarding, and multi-channel notifications reducing manual effort by 80% across operations.
- Integrated OpenAI LLM APIs for intelligent document parsing and auto-classification, reducing human review time for inbound requests by 65% with 92%+ routing accuracy.
- Deployed Telegram Bot and Webhook pipelines to deliver real-time alerts and approval workflows to non-technical stakeholders, enabling instant action on time-sensitive business events.
- Built a no-code abstraction layer enabling business teams to self-serve workflow modifications without engineering involvement, cutting change turnaround from days to hours.

AI-Powered Cybersecurity Automation Workflows — *n8n, Agentic AI, Python, REST APIs*

- Built AI-driven pipelines for automated threat intelligence aggregation, alert triage, and vulnerability prioritization integrated across SIEM, Telegram bots, and cloud security tools.
- Designed scalable event-driven architecture processing events from 5+ data sources, reducing mean-time-to-response (MTTR) by 70% for critical severity alerts.

Passwordless MFA System — *Python, Flask, OpenCV, SQLite, AES-256*

- Built Zero-Trust facial-recognition MFA mitigating phishing and credential-stuffing, with AES-256 encrypted biometric storage—awarded 3rd Prize, GHR Hack 2.0 (2026).

Decentralized Data Management System — *Solidity, Ethereum, Web3.js, IPFS*

- Delivered tamper-proof blockchain-based student record management using smart contracts; optimized gas consumption by 35% securing Runner-Up at GHR Hack 1.0 (2025).

EDUCATION

G.H. Rasoni College of Engineering and Management	Pune, India
<i>B.Tech in Electronics and Telecommunication Engineering</i>	Jul 2026 (Expected)
CGPA: 7.69/10.0	

ACHIEVEMENTS & LEADERSHIP

- **President Drone Club, GHCEM** (Jan 2024 – Dec 2025, Pune, India): Directed a 25-member team to build 3 autonomous aerial prototypes; managed \$1,500+ electronics budget and conducted technical flight-control workshops for 100+ students.
- **Hackathon Excellence:** Top 3 finisher in back-to-back university challenges (GHR Hack 1.0, 2025 & GHR Hack 2.0, 2026) across cybersecurity and blockchain tracks.
- **Penetration Testing:** Identified and remediated 12 high-priority vulnerabilities across web apps and network infrastructure after completing 200+ TryHackMe security challenges.

CERTIFICATIONS

- **Ethical Hacking Certification** – IIT Bombay, 2023
- **Advent of Cyber (Cybersecurity Challenge)** – TryHackMe, 2025
- **C++ Programming Certification** – Info Planet, Jalgaon
- **Web Development Certification** – Data Flair
